 TRIMLESS DOOR

EZY Jamb[®]
 EZY Jamb Single Rebate - SRC

Provide a premium
 finish with the EZY Jamb
 Single Rebate, a smooth
 transition from door to wall.

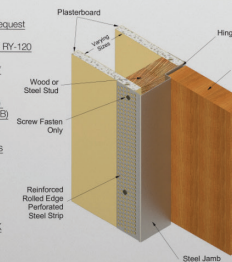

The EZY Jamb Single Rebate aligns
 the rebated edge to one side of the
 door only, this defines a clean and
 tidy transition on both sides of the
 door.
 The single piece door frame is
 available in custom widths to fit
 tightly around the framing and
 provides a quick and easy install.

BARTLETT
INTEGRATED TOWING SOLUTIONS

Trailer Breakaway Protection

BARE KNUCKLE

Bartlett Safety Chain Solutions Lead the World

Our reputation for unsurpassed Bare Knuckle is designed and manufactured to the high strength industry standards. Unlike a weak link, our safety chains are designed to remain intact in the event of a failure. Our design ensures that the chain remains intact, preventing the trailer from becoming airborne. Our design ensures that the chain remains intact, preventing the trailer from becoming airborne.

Towbar Attachment

- Retaining cable clip
- Patented knuckle design for optimum strength
- High tensile pins
- Clip fits directly to chain connectors - no extra required

Trailer Attachment

- Spread welds for improved weld strength, weldability and optimum
- Cleanly marked for rating data and traceability
- Heavy duty pinch clip

Engineering Research Supports Chaining Dogs

Bartlett's original safety chain system is based on the principle of a safety chain that is designed to remain intact in the event of a failure. Our design ensures that the chain remains intact, preventing the trailer from becoming airborne.

"I'm one hundred percent confident!"
Robert Smith

Resimat RM602

Recycled rubber impact sound isolation

Another Quality Building Product

A flat, resilient, recycled rubber underlayment to be used directly under most floor finishes, yielding exceptional results even under hard surface flooring, over concrete and wood joist construction.

PERFORMANCE ATTRIBUTES

- Can thin-set tile and stone directly to the product per ASTM C827.
- Compatible with most floor finishes.
- Fast installation.
- Available in 48" wide rolls and a variety of thicknesses.
- Vapor barrier option available.
- Crack isolation membrane protects ceramic, porcelain and stone tile from substrate cracks.
- Rated extra heavy by the Tile Council of North America.
- Passes VOC Washington State IAQ Test (ASTM D5116).
- Can contribute toward earning up to 9 LEED.

DIMENSIONS

- 2mm in 4" by 75" (1.2m by 22.9m) roll size.
- Sheet Weight: 0.37lb/sq'
- Standard Tolerances: Width: +3/4" - 0"; Length: +1 1/8" - 0"; Thickness: ±0.3mm

ACOUSTICS

Backed by over 400 independent lab and field tests, Resimat has been proven to provide the highest levels of IC sound isolation in the industry. Contact us to access the test reports that meet your needs.

SAMPLE RATINGS: **IC 72, STC 72** with wood flooring, 1 layer Resimat RM602; **IC 70** reinforced concrete slab, suspended ceiling (ANSI S000001, 7000kg); **IC 50, STC 63** with LVT flooring, 1" gypsum concrete, Resimat RM602, wood truss, resilient channels, suspended ceiling (ATH-C8700/05-113-11 #93).

Binotto

THE TIPPING POWER

Binotto Cylinders

Binotto designs, manufactures and distributes a complete range of hoists for all tipping applications.

- Underbody, front-mount and well-mount configurations.
- 2 to 100 tons capacity
- 3-way taper options
- Rear-tipping and side-tipping applications

Binotto Construction

The key features and superior seal and viper system of Binotto hoists, ensure they operate and are proven in the most extreme environments, from Siberian steppes to Saudi deserts.

- Only high-quality steel producers are accepted as Binotto strategic suppliers (such as Dalmine and Mannesmann)
- All stages and outer tubes are manufactured exclusively from seamless steel-tube with a high yield-point (R_e = 48 kg/mm²) and high tensile strength (R_m = 65 kg/mm²)
- Binotto stages are roll-hardened for exceptional smoothness. This feature, along with the use of special bushes, ensures a clearance of no more than 0.07mm between stages is achieved – a vital aspect in resisting side-loads and bending factors.
- The internal and external “rolling” burnishing process for all stages and outer tubes, increases steel performance and life, resulting in more reliable and long-lasting products.
- A solid-stage design and absence of stop-removing rings is an unsurpassed solution. Binotto’s design, with slope-contact faces machined directly from solid tube, without welds, provides maximum safety and service life. (B3 models)

Front-mount hoists

Well-mount hoists

Underbody hoists

THE TIPPING POWER

Binotto Quality

Binotto operates under the highest International Quality Standard (ISO 9001). This gives the group the ability to combine state-of-the-art plant automation with the expertise of its staff.

- Controlled and documented processes and procedures
- Continual process optimisation
- Skilled and dynamic staff
- Spirit of initiative and continuous research
- Company culture targeted at quality
- Dedicated and proficient customer service

5-AXIS MACHINING POWERHOUSE

Robust performance and small footprint with the GENOS M460V-5AX

The next generation GENOS M460V-5AX, 5-axis vertical machining centre made in Japan, is specifically designed to manufacture high precision parts and deliver impressive metal removal rates in a compact design. Its solid double-column structure, full 5-axis simultaneous control and thermal stability performance give it the ability to easily cut a variety of materials.

The Okuma Advantage Intelligent Technology

These features are unique to Okuma because we make every part of our machines and controls. We create applications highly tailored to enhance each machines performance. By leveraging the power of the OSP control, Okuma has enriched its machines and controls with Okuma's Intelligent Technology.

PREMIUM PRODUCTS
QUALITY SERVICE

PRODUCTS YOU CAN TRUST FOR PERFORMANCE AND RELIABILITY

Global Clamps have scoured the globe to source the best quality, most reliable industrial clamping solutions for your business.

We recognise the importance of our products being mission critical in applications that rely on high performance, reduce the risk of failure, protect down time and maintain the efficient running of machines and equipment.

Applications include:
• Hoses • Pipes • Cables • Cylinders • Signs • Ducts

BRINGING TOGETHER THE BEST BRANDS

We stock and source a comprehensive range of products from key European OEM suppliers, ensuring the highest quality and performance from each and every part.
